## EXPERIENCE

2025 - Now

**Sr. Art Director**

Wondershare (Vancouver, Remote)

Led the creative direction and execution of digital campaigns for Wondershare products, including Filmora, in the North American market. Supported the Creative Director in developing design-driven marketing strategies that aligned with business goals. Oversaw the creation of visual assets for marketing campaigns, websites, product interfaces, social media, presentations, and more. Played a key role in co-marketing initiatives by collaborating with partners to craft innovative and engaging campaigns. Developed and maintained brand guidelines, ensuring consistency across all digital touchpoints while delivering high-quality visual content.

2024 - 2025

**Product Designer (Part time)**

Obinex (Dubai, Remote)

As a Product Designer, I am part of a team developing an exchange that integrates DEX and CEX elements while incorporating gamification into the trading process. The product is currently in the development phase.

2024 - 2025

**Design Lead / Product Manager (Freelancer)**

Aurk (Germany, Remote)

Aurk is a newly launched token focused on developing an AI service platform on the blockchain. As the Design Lead, I am prioritizing the development of the platform's user experience (UX) and guiding the Branding Designers in producing materials for X and other platforms.

2021 - 2024

**Art Director**

Candybox Marketing - Oakville, ON (Remote)

I supported the Creative Director on all key accounts, developing creative strategies for branding, videos, and campaigns. I also coached junior designers and managed the development of web products and solutions. On the creative side, I helped the Creative Director develop creative campaigns, most of which were web or social media-based. With my expertise in branding, I oversaw projects from their inception, ensuring they effectively conveyed the brand message across social channels, promotions, and web solutions.

I guided the development of UX/UI to ensure consistency with the brand's guidelines and visual elements. For a key account, I served as a UX generalist, supporting the entire process of creating customized websites—from research and wireframe development to delivering final assets.

2019 - 2021

**Design Lead (Art Direction)**

Metis DAO - Toronto, ON (Remote)

**HELPED GROW COMPANY TVL FROM 0 TO \$1 BILLION IN UNDER 3 YEARS.**

As the Design Lead, I was responsible for everything related to branding, advertising, and design, including the UX of bridges, portals, scanners, and more. I was the key person supporting branding and UX development for key partners and projects under the Metis DAO umbrella. The original logo and the current version of the company's branding are my designs, and I developed the entire company branding and communication strategy during my first year.

We organized events around the globe, from ETH Denver to Lisbon, and from Dubai to China. Our global team often required support for everything from simple Twitter banners to complex interfaces designed for clients in multiple languages, including Chinese, Russian, and Japanese. I developed all the printed materials, conceived ideas for the events, designed swag, and managed a team of remote designers to deliver all materials to printing partners in Europe, the US, and China.

In almost three years, and under the direct command of the C-suite, I helped the company grow from zero to one billion dollars in total value locked (TVL). I also developed several NFT projects. Notably, I was the creator of the first NFT series for METIS and Crypto Chicks.

2019 - 2021 (Side Project)  
**Co-founder / Product Lead (Branding & UX)**  
Mini-Metis - Toronto, ON (Remote)

As a co-founder, I developed everything from the business plan to all marketing-related initiatives. With a team of front-end developers and smart contract specialists, we successfully launched a swap platform and a borrowing & lending page.

Additionally, I designed and developed an NFT series, including promotional videos.

2017- 2019  
**Digital Designer / Partner**  
Creative Ally, Oakville, ON

As a designer and partner, I worked on developing design solutions for small and medium businesses in the Greater Toronto Area. In addition to design work, I managed client relationships, coordinated with suppliers, and contributed to business development.

2016- 2017  
**Digital Designer**  
The Works Design, Toronto, ON

I was honored to receive an invitation from the Canadian government to immigrate to Canada as a Permanent Resident due to my exceptional abilities as a designer and business owner. My first job in Canada was at a design agency, where I had the opportunity to work with major clients like Maple Leaf Foods, Newmont, Barrick Gold, Exxon, and Oxford.

2014 - 2016  
**Founder, Art Director**  
True North Design, Sao Caetano do Sul, SP

After acquiring enough experience working for prominent agencies in São Paulo, I became an entrepreneur and launched my own agency. During this time, I worked with notable clients in Brazil, such as the São Paulo State Symphony Orchestra, VW, Jaguar, and UNESCO.
